(54) Title: DISTRIBUTED AND SCALABLE ARCHITECTURE FOR ON DEMAND SESSION AND RESOURCE MANAGEMENT

(57) Abstract: A system for on demand session and resource management in an on demand platform for delivery of on demand digital assets is distributed and scalable. A session manager manages on demand sessions. A resource manager manages resources associated with the on demand delivery of a digital asset to an on demand client. The architecture is partitioned into logical components. Each logical component interfaces with at least one other logical component through a defined interface. The session manager is a separate logical component from the resource manager.
